

# ■ Safer. Clearer.

Sustainable lighting solutions improve the welfare of horses and optimise their performance.

NATURAL LIGHTING

GLARE DISBURSEMENT

OPTIC LENS CONTROL

WATER PROOF

SHOCK RESISTANT

CORROSION RESISTANT

MAINTENANCE FREE

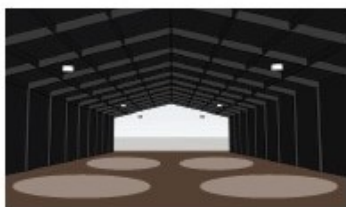

5-YEAR WARRANTY

## Specialised design for horse vision

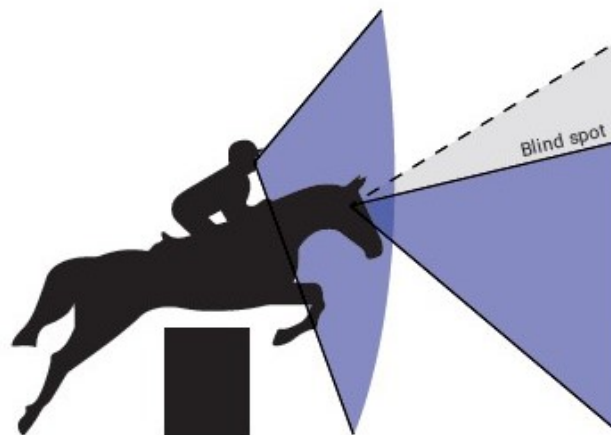

### Uniformity

Well planned light positioning produces more uniform lighting to reduce shadowing.

### Risk of glare

Although the horses' vertical visual range is narrower, it's still important to install lights at the correct height for riding safety.

### Enhanced visibility (high CRI)

through clarity and contrast for both horses and riders.
